

No-Code Automation

Build AI Agents that work for you

Accredited by

OVERVIEW

Build Intelligent Agents. Automate Anything.
Master the tools, strategies, and real-world workflows automation using AI.

How You'll Learn

- ✦ Duration: 2 months,
- ✦ 2 days/week, 18:00 – 21:30 PM
- ✦ Total Training Hours: 64 including hands-on & career coaching.

Delivery Mode:

- ✦ Mix of Interactive live sessions with lead instructor.
- ✦ Guided self-paced No-Code labs at your preferable time.

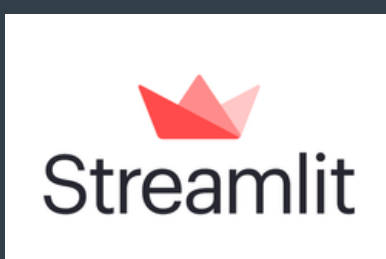

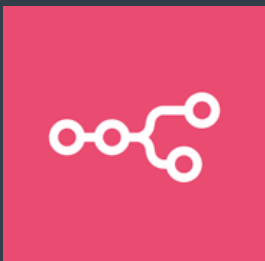

Prerequisites:

- ✦ Strong computer skills
- ✦ No prior programming/AI knowledge required

LEARNING OBJECTIVES

Become an AI-Ops Leader, Not Just a Tool User
By program end, you will gain the skills of:

- ✓ **AI Agent Mastery**
Build & deploy autonomous AI-powered agents for real-world tasks
- ✓ **Workflow Automation**
Design end-to-end pipelines (APIs, WebHooks, dataflows) with n8n & Zapier
- ✓ **No-Code App Development**
Turn Ideas into Prototype with UI & dashboards using Bubble.io, no coding needed
- ✓ **Optimization & Control**
Monitor performance, instrument SLAs & build Streamlit dashboards
- ✓ **Show & Sell**
Present and Sell a full AI-Ops solution to stakeholders and customers

MODULES & PLAN

1

AI Tools & Prompt Engineering

master ChatGPT, Claude, and Gemini by giving them the right prompts

2

No-Code App & Agent Dev

Build smart apps and AI agents with no-code using beginner-friendly platforms like Bubble.io and n8n.

3

Workflow Automation

Automate everyday tasks and business processes using visual tools like Zapier and n8n.

4

Advanced Agents & AI Ethics

How intelligent AI agents work, and explore the responsibilities of building with AI tools like LangChain.

5

API Security & Integrations

Understand how apps and tools talk to each other safely using APIs, WebHooks, and protect your data.

6

Monitoring & Dashboards

Track the performance using Streamlit to build clear dashboards and alerts.

7

Capstone & Career Launch

Put everything into one final project, and prepare for your first AI automation business deal.

WHY CHOOSE MYSTRO AUTOMATION WAY

Join us on an industry-driven learning journey that equips you with the most demanded AI skills, hands-on project experience, and a government-accredited certificate. all designed to launch your career in months, not years.

AZAV- German Certified

Receive an AZAV-
accredited vocational
certificate recognized
across Germany

For Beginners and Pros

From no-code learners to
workflow leaders—no dev
background required

Industry-Aligned Curriculum

Built in collaboration with
top automation
engineers & AI product
experts

Hands-On First

Build 7+ fully deployable
business automation
systems

SUCCESS STORIES

Discover how our graduates transformed their careers from zero coding experience to secure AI roles in months. Their journeys showcase the real impact of hands-on projects, expert mentorship, and career support

//

I built an automated invoice processor that saved my company 18 hours a week.

Maria H.

//

I prototyped a customer support AI agent in Bubble + n8n. It helped me land a job in a fintech startup as their Automation Lead

Rayan E.

//

Using what I learned in the track, I built a sales dashboard and delivery automation flow for my family's online store. It doubled their monthly revenue in 2 months

Sami A.

//

I automated data entry tasks at my NGO using Make and Google Sheets. It saved us hundreds of hours. They promoted me to Digital Transformation Officer.

Zein A.

ABOUT MYSTRO

Germany's First AZAV-Certified AI Academy

Mystro proudly stands as Germany's first accredited institute specializing in AI education. We equip individuals and organizations with the most demanded AI skills. Focused on high-quality training, and real-world experience.

Our Vision

To walk hands by hands with professionals regardless of background, to build and innovate in the AI era through hands-on, career-focused training.
